

CHEMICALS:

PRONTO use at 1:4

PADS:

Black

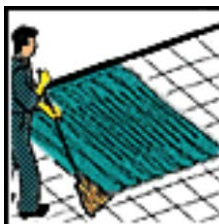

EQUIPMENT:

Personal Protective Equipment (goggles, gloves)
Wet Floor Signs
Dust Mop
Putty Knife or Edging Tool
2 Mop Buckets with Wringers
Cotton Mop to apply stripper

Clean cotton mop for rinse
Rotary Floor Machine -Low Speed
Broom & Dust Pan
Wet Pick-up Vacuum
Wiping Cloths

PROCEDURES:

STEPS	KEY POINTS
<p>1. Assemble equipment</p> <p>2. Remove any free-standing objects from the floor. Vacuum or clean the walk-off mats and set aside</p>	<p>1. See above.</p> <p>2. Place "Caution-Wet Floor" signs at the end of each area. Place walk-off mat at exit area.</p>
<p>3. Remove gum and other material with putty knife. Tape edge if this area meets another tile or carpet area.</p>	<p>3. Deposit in waste receptacle.</p> <p>4. Work toward ends of aisles, pick up with dust pan and broom.</p>
<p>4. Dust mop entire floor and remove all dry soil.</p>	
<p>5. Wearing appropriate safety equipment according to product label directions.</p>	<p>5. Local site OH&S requirements may require specific chemical handling</p>
<p>6. Mix stripper per label dilution. Note: Add chemical to water and never leave chemicals unattended.</p>	<p>6. Use warm to hot water to soften old polish build-up unless label instructions require cold.</p>
<p>7. Ensure adequate ventilation is present.</p>	<p>7. Open windows or mechanically ventilate area.</p>
<p>8. Using mop and bucket apply stripper liberally to the floor.</p>	<p>8. Areas may require Taping to prevent stripper migration</p>

9. Allow stripper to stay on floor for 5-10 minutes.
10. Use edging tool to strip close to baseboards and in corners.
11. Scrub floor with single disk floor machine and Selected stripping pad.

9. Keep floor wet, apply more stripper solution if required.
10. Attention is required in any areas inaccessible to machine.
11. Make slow overlapping passes with machine. Work from areas already stripped to minimise slipping on floor. Change pads and rinse as they become full for reuse.

NOTE: Remember not to allow stripper to dry on floor, so do not get too far ahead of the floor machine before picking up the stripper.

12. After scrubbing, pick up stripper solution with a wet vacuum or mop.

12. Work from dry area to wet and away from vacuum to avoid tangling cord.

13. Apply rinse water with clean rinse mop.
14. Pick up rinse water with a wet vacuum or clean mop.
15. Wring rinse mop dry and mop over the floor.

13. Hot water will speed dry time.

14. Amount of rinsing required will be dependant on stripper used.

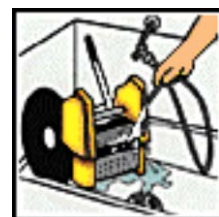

15. Make sure to mop over areas that are streaked from wet vacuum.

16. Allow floor to dry to touch

16. Check for dark or shiny spots of old finish. Repeat steps 8 - 14 on any spots not completely stripped.

17. Check for stripper residue on the floor with palm of hand.
18. Clean all equipment and return to its appropriate area. Remove wed floor signs.

17. White powder on palm indicates insufficient rinsing. Repeat steps 13 - 17 again.

18. Equipment in good clean working order improves the quality of the result.
